1. what was good?/ 3. What you liked?

-Through thick and thin, despite your departure, you stuck on and helped us every step of the way. in order to gauge the definition of every step, every question, query, doubt, wrong sentence, etc was corrected, answered, guided, coached, etc.
As yet, in comparison, i've yet to hear another group speak of their FYP supervisor helping them on that level as well.

-The vision, the plan, the execution. There was a plan from the start, backup plan for when shit hits the fan. Methodical, systematic, effective, efficient would be words to describe your work ethics, which I liked alot. From deadlines, to book-keeping, to system of how things are to be done, security and backup of files etc as well. The systematic approach and fixed goals and targets help us chart and know where we stand, what's ahead, what's behind and what to do next. The pushing of us towards the goals was good, for there was a reason for everything set up, and it's when it all over or when we cross the stages of work and in looking back that we admire the grand scheme of things.

-Rarely do teachers actually give a damn to actually stay back on saturdays, holidays, weekends, day offs to help. The level of commitment to help and see the project through, damn. I'd be damned to find another teacher on that level.

-Your guidance transcends the physical. Goes onto online/sms/msg helpline too. Damn fast replies too. Better than a customer service hotline with A* service, fast reply, immediate action/solution.

-Flexible and understanding. Strangely for a man with a set plan/vision/methodical and efficient, you never seem to force anything unto us.

-Awesome to eat outside/in teacher's office/lab

-Free food/buffets. Hey, free food's always good.

2. What's Bad?

Long hours are the only possible thing i can think of. Though I understand that it is necessary to achieve our target and goals, without the long hours we wouldn't have gotten much work done... Sacrifice of holidays? though that's the fault of the piss poor socket that always fucks up our PCR during the YOG break.... that's all i can possibly think of....

4. What I prefer to have?

If given the chance to re-choose my FYP, i'd still pick to work with you. No second thoughts. I like your working style, plan, ethics, rules, vision. Has been a pleasure and honour working with you Sir.

1. Help was always there. Any matter that wasnt understood could be clarified quickly.
2. Sometimes go too quickly. cannot catch up.
3. The help that was always there.
4. I thought that was alot already.

Hi guys

Need you to give me comments on how I perform with respect to FYP supervision and coaching...

1. What's good?
2. What's bad?
3. What you like?
4. What you prefer to have?

Thanks

Maurice LING

1) you would stay with us all the way even if you were gone, make the effort in helping us in whatever you can. I'm grateful and appreciative for all ur doings =).

2) hmm..although you did ur best to help us..sometimes i find it difficult to keep up with ur request. Its not only ur work that we have to settle, but i got other reports, test and personal life to do. Everything does not revolve around fyp..hope you can understand.

3) dinner we can sit down talk cock, sometimes u can join in and share ur experience such as university admissionm, criteria, ur horniness etc...

4) join in the talk with us!!! dont always emo 1 corner, it looks as though we are leaving you out haha..you are our friend, not only our teacher..

1. 24/7 Help. almost as good as mac delivery haha. You are a very detailed person and will try your best to help us whenever you can!! So we are very guided through our FYP.
2. As I am rather slow in understanding stuff, I found your pace abit too fast in the start of the FYP. But through the months, I got used to it.
3. I feel comfortable when consulting you for help. Am actually afraid to meet up with certain lecturers.

1. You helped us a lot during the whole time, very grateful to you. A lot of questions were identified first before we actually encountered them, so it helps us to save some time trying to solve the problem. A lot of times u pushed us very hard, although quite tiring but its very useful as we did actually finish our stuff much earlier than others.

2. A few of the occasions you need us to accomplish things by a certain deadline, but we actually got other stuff to do also, so its very hard for us to follow with your deadline.

Aside from the supervision part, i personally think that for research, this long term evolution project is very good as it actually allows a long time research. However, for this project to be done as fyp it will be quite hard, a lot of parameters have already been set from the previous experiments and it will be quite difficult for future batches to come out with new stuffs to do In the end during the presentation, it will seems that those students that have continued the project are not actually doing a lot as seen on the surface but i know a lot of work is done with the calculations and analysis but it may not be obvious to other people.

3. The times when you shared with us about your personal experiences and about other stuffs other than work. It breaks the teacher-student barrier which is good for communications.

4. Maybe you can talk more with us sometimes? Haha, sometime you just sit there and smile smile then we talking among ourselves so like abit awkward.

FYP feedback

How Jian Ann <des_fire@hotmail.com>

Mon, Feb 7, 2011 at 11:09 PM

To: mauriceling@acm.org

1. What's good?

The best thing would be that it is easy for me to reach you and ask you questions regarding fyp, even though its late at night.

Another good point is that you would be there to supervise us most of the time, even when we're doing regular work like passaging, glycerol stock.

You will make a point to read our logbook many times and correct any writing mistakes.

2. What's bad?

Nothing much, just that sometimes i feel squeezed to be productive.

3. What you like?

When you make it a point to come down to school to help us for our presentation and also report writing when you have already left SP.

Also staying back even though its a saturday.

4. What you prefer to have?

nothing much
